

Title I Annual Review Minutes 5/25/21

Committee- Mylissa Hall-Principal

Scotty Shimabukuro-AP

Kristin Kelley-AP

Terrie Cross- Financial secretary

Margarita Curry- Parent

Review of focus goals for 20-21 school year

1. ACT interventions- We did not have a formal selected program, but strategies were implemented in core classes throughout the year. Aspire results data was used to drive instruction and interventions. Teachers used bell ringers and released questions for review. ACT test data is not available for review yet.
2. Enhancement- 9th graders were placed in a semester of reading enhancement and a semester of math enhancement to help with gaps in learning due to lost instruction time during pandemic. Data shows growth in both reading and math programs.
3. Parent nights/communication- We were not able to host parent nights this year. We did hold virtual Title I meetings which were successful, as well as virtual parent/teacher conferences.
4. Active engagement in PKLC's- Solution Tree PD was our primary professional development this year. We did see increased engagement as a whole in our PLC's throughout this process. CFS's are common, teachers are using rubrics to define mastery, benchmark data is being dissected to guide instruction.

Revisions for next year-

1. We will be using a specific ACT review program purchased by the district. We will continue will bell ringers and release questions in classes. We will also use some of our Advisory time to review test taking strategies.
2. We will look to continue Achieve programs.
3. We will do better to implement 2 parent surveys during the year in 21-22. Will put out principal newsletter via blackboard texts.
4. PLC active engagement will continue as a focus next year. We will use our Solution Tree consultant again. We will continue to grow in data review by standard, by student.
